SPECIFICATIONS

Spiral kneading with firm head, ideal for small spaces with rotating wheels. To the construction are used high quality and robustness materials. Thanks to the particular shape of spiral and to the rotating movement of the utensil combined with that of the basin, the spiral kneading, gives possibility to mix in few minutes 25 Kg dough, and assures very good homogeneity and oxygenation. The model assure constant temperature of the dough from beginning to end working, so eliminate the danger of incidental overheating. The transmission system is particularly silent because all parts are assembled on waterthight ball bearings with bath oil motoreducer, free maintenance. The machinery is provided of indispensables safety devices.
